AN ESSENCE OF ENGLAND

# ESSENCE OF ENGLAND

True Grace are makers and purveyors of candles and other beautifully perfumed goods.

Combining the finest natural ingredients and a love of English fragrance, we create an "Essence Of England", "As It Should Be" in everything we make.

Carefully curated collections of evocative fragrances blended by English perfumers and sustainably sourced raw materials combine with the beauty and form of our exquisite hand blown glass vessels.

## OUR WAX

Our candles are hand-poured, using a blend of renewable vegetable and natural waxes. The unique combination that we use produces more oxygen than a typical paraffin or soy wax candle, producing better air quality and very little soot. The wick is pure cotton, burning more cleanly than a man-made nylon core. Natural wax for an even and clean burn.

### RAPESEED WAX

A renewable, sustainable crop, responsible for the fields of yellow throughout England's countryside. Our rapeseed is sourced in Europe and is GM-free. A very soft wax, with a smooth finish, softening the other waxes in the blend and allowing for a lower burning temperature.

### COCONUT WAX

Made from cold-pressed coconut oil, adding this wax to the blend aids the burn by increasing the burn time of the candle.

### BEE SWAX

Traditionally used for hundreds of years in candles, beeswax removes impurities and balances the consistency of the wax, increasing the burn time.

## OUR SECRET INGREDIENT

This is at the heart of our wax recipe and is what makes True Grace candles so special, ensuring the candles burn cleanly and perfume beautifully.

## OUR VALUES

The name True Grace reflects the honesty and beauty at the heart of our company. Our choice of raw materials and approach to manufacture enhances the quality of everything we produce.

Carbon Neutral

## OUR NATURAL CREDENTIALS

All of our products are handmade in our own factory, powered by green energy.

We are one of the few true candle makers in England. Based in Wiltshire, our factory is ecologically sound and environmentally friendly, powered by a combination of solar power, through panels installed on the roof, and renewable biomass.

We strive to maintain carbon neutrality, to reduce our CO2 emissions and prevent contributing to manmade climate change.

## AS IT SHOULD BE

We believe that perfume is strongly associated with memory and emotion. We capture some of these special memories through our scents, inspired by our life in the country, which immediately evokes nature, architecture or simply a feeling.

## NURTURING TRADITION

We believe in employing the age-old methods of creating candles, using traditional skills and pouring our candles by hand.

## RESPECT FOR NATURE

We care for our environment, from using only renewable and ecologically sound waxes in our candles to ensuring our factory is entirely self-sufficient in energy production.

## FOUNDERS

Making scented candles for many years for some of the worlds most respected brands, Philippa and Roger Biles founded True Grace in 2003 to celebrate their love of fine fragrance and make use of their wealth of knowledge. From a stall in Portobello market in West London True Grace quickly became well known for wonderful home fragrance and was soon stocked by department stores and lifestyle shops around the world. Today, True Grace products continue to be made by hand in their own carbon neutral factory near Philippa and Roger's home in the Wiltshire countryside.
