## ESSENCE OF ENGLAND

True Grace are makers and purveyors of scented candles and other beautifully perfumed goods.

Combining the finest natural ingredients and a love of fragrance, we create an Essence Of England, as it should be, in everything we make.

Carefully curated collections of evocative fragrances blended by English perfumers and sustainably sourced raw materials combine with the beauty and form of our exquisite hand blown glass vessels.

### OUR WAX

Our scented candles are hand-poured, using a blend of renewable vegetable and natural waxes. The unique combination that we use holds oxygen in the wax, resulting in better air quality than a typical paraffin or soy wax candle, and very little soot. The wick is pure cotton, burning more cleanly than a man-made nylon core.

**RAPESEED WAX** Rapeseed is a renewable, sustainable crop, responsible for the fields of yellow throughout England's countryside. Our rapeseed is sourced in Europe and is GM-free. It is a very soft wax with a smooth finish, which softens the other waxes in the blend, allowing for a lower burning temperature.

**COCONUT WAX** Made from cold-pressed coconut oil, adding this wax to the blend aids the burn by increasing the burn time of the candle.

**BEE SWAX** Traditionally used for hundreds of years in candles, beeswax removes impurities and balances the consistency of the wax, increasing the burn time.

**OUR SECRET INGREDIENT** This is at the heart of our wax recipe and is what makes True Grace candles so special, ensuring the candles burn cleanly and perfume beautifully.

### OUR TOILETRY INGREDIENTS

Our toiletries are at least 96.6% natural and made from only the best natural ingredients without any of the nastiness of parabens, PEG's, petrochemicals and SLS. Not only are they full of ingredients that are great for your skin and the planet, they are also completely cruelty free.

### OUR VALUES

The name True Grace reflects the honesty and beauty at the heart of our company. Our choice of raw materials and approach to manufacture enhances the quality of everything we produce.

Carbon Neutral

### OUR NATURAL CREDENTIALS

All of our products are handmade in our own factory.

We are one of the few true candle makers in England. Based in Wiltshire, our factory is ecologically sound and environmentally friendly, powered by a combination of solar power, through panels installed on the roof, and renewable biomass.

We strive to maintain carbon neutrality, to reduce our CO2 emissions and prevent contributing to man-made climate change.

### AS IT SHOULD BE

We believe that perfume is strongly associated with memory and emotion. We capture some of these special memories through our scents, inspired by our life in the country, which immediately evoke thoughts of nature, architecture or simply a feeling.

### NURTURING TRADITION

We believe in employing the age-old methods of creating candles, using traditional skills and pouring our candles by hand.

### RESPECT FOR NATURE

We care for our environment, from using renewable and ecologically sound waxes in our scented candles to ensuring our factory is entirely self-sufficient in energy production.

### FOUNDERS

Making scented candles for many years for some of the worlds most respected brands, Philippa and Roger Biles founded True Grace in 2003 to celebrate their love of fine fragrance and make use of their wealth of knowledge. From a stall in Portobello market in West London True Grace quickly became well known for wonderful home fragrance and was soon stocked by department stores and lifestyle shops around the world. Today, True Grace products continue to be made by hand in their own carbon neutral factory near Philippa and Roger's home in the Wiltshire countryside.
